By Aristoteles — Opel Blitz

Opel Blitz Mod for CM Normandy.

The Wehrmacht and SS truck in CMBN is the Opel Blitz. In WW2 the 3 tonnes version was the most used and the one depicted in the game.

Inside the Zip you will find:

- One Folder with preview screenshots.
- One folder for a generic Mod.
- A readme PDF.
- A "decal" folder with 3 Units to choose from.

Unzip "Aris_Opel Blitz Mod" to your Z folder within your Data directory and if you like to include the decals then go to the "Decals" folder, rename the BMP you want and unzip or paste over the generic BMP.

Weathered with photoreal samples of mud, sand, dirt, scratches and tons of Photoshop custom brushes.

A Mod for Combat Mission Normandy

Hope that you like it.
