Sd Kfz 250/1 Halftrack Mod

## Sd Kfz 250/1 Mod for CM Normandy.

Most of the Sd Kfz 250 vehicles were issued to the Aufklärungsschwadrons of Panzerdivisions, though many found rolls as command and observation vehicles when the specialist variants of these were not available. The Sd Kfz 250/1 was the standard troop carrier.

Inside the Zip you will find:

- One Folder with preview screenshots.
- One folder with Variants.
- Four bitmaps for a generic Mod.
- A readme JPG.
- 
- Unzip the generic bitmaps to your **Z folder** within your **Data** directory and if you like to include the decals then go to the Variants folder, rename the BMP you want removing the latter part ( “\_SchultzeGreen” or “\_SchultzeBlack” and unzip allowing overwriting).

The variants included depict a [Pz-Gren-Lehr-Regt 901's 11. Panzer-Pioneer-Kompanie Sd Kfz 250/1](#). As to the true design & colouring of the disc-shaped marking, at this stage it is not possible to be sure, given the nature of the photos currently available

so I have included both “Black” and “Green” versions, check Preview folder for screenshots.

It is believed this “S or G” denotes, in typical German military fashion, Pz-Gren-Lehr-Regt 901.’s commander, Generalmajor Georg Scholze, a native of Eastern Saxony and a Jaeger veteran of the First World War.

On the basis of these facts, the design of the marking at this stage is *very tentatively* interpreted to depict a Saxon warrior of old – the predominantly green and white design representative of Saxony (as per the Saxon cockade used in WWI), with the green also representative of both Jaeger and Panzer-Grenadier branch of service colour.

The partial hexagonal shape surrounding the Frakturschrift “S or G” is also a specific design associated with Panzer-Lehr Grenadiere.

Enjoy!!!
