Sd Kfz 250/3

Sd Kfz 250/3Mod for CM Normandy.

The 250/3 variant was used by battalion and higher commanders as personal command vehicles. The Sd Kfz 250/3 was equipped with radio equipment and "bedstead" aerial frame.

Inside the Zip you will find:

- One Folder with preview screenshots.
- One folder with decals for a PzLehr Halftrack.
- Three bitmaps for a generic Mod.
- A readme JPG.

- Unzip the generic bitmaps to your **Z folder** within your **Data** directory and if you like to include the decals then go to the Variants folder, rename the BMP you want removing the latter part (from “sdkfz250-3-hull_911” to “sdkfz250-3-hull”), and unzip or paste over the generic BMP.

The variant included depicts a Pz-Gren-Lehr-Regt 901, 9. Kompanie Sd Kfz 250/3, which was in fact the Infanterie-Geschutz-Kompanie (IG-Komp., aka self-propelled 15.cm howitzer company).

Enjoy!!!
