

Loyd Carrier

A MOD FOR COMBAT MISSION GUSTAV LINE

Aris Loyd Carrier

The Loyd Carrier was one of a number of small tracked vehicles used by the British and Commonwealth forces in the Second World War to transport equipment and men about the battlefield. It was built upon the engine, gearbox and transmission of a Fordson 7V Truck, with mild steel bodywork to which armor plate was bolted depending on application.

The upper hull of the Loyd Carrier was covered to the front and sides but was open to the rear and above.

The Loyd carrier is the typical tractor for the 6pdr anti-tank gun.

INSTRUCTIONS

Go inside the Data folder and create a new folder called "Z". Because "Z" comes after the names of the standard game files ("Version XXX") you are guaranteed that any mods you put into the "Z" folder will be loaded and used by Combat Mission.

Or..according to GL Manual Page 58:

"Replace all references to the location of the Mods folder inside the game's Data folder with references to the Mods folder located under {My Documents}\Battlefront\CM Fortress Italy\User Data. This is now the recommended location for user mods, and is treated like the game's standard Data folder for all intents and purposes.

Unzip and drop "Aris Lloyd Carrier GL" to Z (or the above mentioned, BFC recommended folder).
