

A MOD FOR COMBAT MISSION FORTRESS ITALY AND BATTLE FOR NORMANDY

Muzzle Fire and Tracer Mod VERSION 2.0

Aris Muzzle Fire and Tracer Mod VERSION 2.0

This is Version 2 of my previous Tracer Mod. And it's fully compatible with CMFI and CMBN.

This time, I have included 5 different muzzle fire blasts, 5 muzzle fire stars and 4 tracer options, long and short. Check the included preview pictures to find your choice, or change them from time to time. I have prepared 5 sets for the Muzzle effects, but you may pick one blast from one set and a muzzle star from another, creating even more variations.

All textures are photoreal and extracted from real clips.

INSTRUCTIONS

Go inside the Data folder and create a new folder called "Z". Because "Z" comes after the names of the standard game files ("Version XXX") you are guaranteed that any mods you put into the "Z" folder will be loaded and used by Combat Mission.

Unzip and drop "Aris Muzzle Fire and Tracer Mod 2.0" to the desktop or an empty folder, then preview and select one "muzzle fire blast.bmp" and one "muzzle fire star.bmp", select a tracer set and drop all these textures to Z.
