

## M5&M5A1 Lend Lease Halftracks Mod for CM Normandy.

Externally almost identical to the M3, but with a 450 cu in (7,400 cc) engine, the **M5** is heavier than the M3, due in part to heavier armor. Its rear frame sides were manufactured in one piece, rather than bolted. The M5 was primarily manufactured for Lend-Lease, to Britain, Canada and other nations.

The **M5A1** was a M5 with a M49 machine gun mount. It could fit one .50-caliber (12.7 mm) and two .30-caliber (30.06) machine guns. The models produced by International Harvester Corporation (IHC) had a slightly lower top speed and lower range as well.

Photoreal samples of mud and dust, and HD Photoshop brushes were used to mod this vehicle. 2 Decal Options.

# A Mod for Combat Mission Normandy

## INSTRUCTIONS:

Go inside the Data folder and create a new folder called "Z". Because "Z" comes after the names of the standard game files ("Version XXX") you are guaranteed that any mods you put into the "Z" folder will be loaded and used by Combat Mission.

Extract "Aris\_M5 LendLease HTs Mod" folder there, copy and paste additional decals to this folder if you like them, they are already appropriately numbered.
