A MOD FOR COMBAT MISSION FORTRESS ITALY

## Aris SdKfz 250/1

The Sd.Kfz. 250 was a light armored halftrack built by DEMAG. Compared to U.S. halftracks, the SdKfz 250 series was less mobile, with unpowered front wheels. However, its tracks made it far more mobile than the armoured cars it replaced, and it was a popular vehicle. Most variants were open-topped and had a single access door in the rear. The Sd. Kfz 250 was adopted in 1939 but production delays meant the first 250 did not appear until mid-1941. The Sd.Kfz. 250/1 leichter Schuetzenpanzerwagen (SPW) was the standard troop carrier.

## INSTRUCTIONS

Go inside the Data folder and create a new folder called "Z". Because "Z" comes after the names of the standard game files ("Version XXX") you are guaranteed that any mods you put into the "Z" folder will be loaded and used by Combat Mission.

Unzip and drop "Aris SdKfz 250\_1 FI" to Z, then add decal from the Decals folder. It is already renamed so that it will work with just a "copy and paste".

**Photoreal samples of mud, a LOT OF dust, stains and Hi-Res Photoshop brushes were used to mod this vehicle. 1 Decal Options.**
